

Minerals and electronics links and new scanner website

Some interesting links about the minerals that go in to our electronics.

Contact Info for Gary KC2HWE : email. Wedig4fun@gmail.com

New scanner website from Jared N2JMO: <https://upstate800.com/>

It might be a day or two before he gets the issues with the feeds fully sorted out.

Here is the Github repository for the software behind the whole thing for anyone interested:
