

Target Listening by Country

A monthly publication of the
ONTARIO DX ASSOCIATION
MARCH 2024

Harold Sellers, 3211 Centennial Dr., Unit 23,
Vernon, BC V1T 2T8 E-mail: dxerharold@gmail.com

Target Listening provides a guide to where, when and how to hear radio countries operating on the shortwave bands. Reports from DX references and our readers are used to compile tips that can assist you to hear these countries.

This column was updated February 28th.

Notes:

(1) The purpose of Target Listening is two-fold. One, to give you tips on how to hear the country in question. Second, to help you in your quest to hear as many countries as possible. Some targets are easy to hear, while others may be extremely difficult – and everything in between!

(2) Target Listening includes two sections. The first section is a by-time listing, which lists only time, country and frequencies. The countries listed here may be relay sites or the direct source of the broadcast. [Refer to the by-country listing for that country for complete details.] The second section is a by-country list giving the best chances to hear the country, according to monitoring reports from reporters or from other publications and sources. We give you the best chances to hear broadcasts direct from transmitters in the target country, but we also list relay transmissions if these may be well heard, so those interested in the programs from the country have the best opportunity to hear them.

(3) Relay broadcasters may be found under both the country where the studios are as well as where the relay transmitters are. In the first case, this is so you will know where to look for the transmissions of that country's broadcaster. In the latter case, the intent is to give you an easier

(usually!) target to log the country serving as a relay.
